

DFB018
DF-AUDIT TRAIL BALANCE

PROGRAM FUNCTION:

This program lists all category changes to category 6 and 7 and prints the new categories within a parcel. It can be used as an aid in tracking parcels that may be eligible for deferred tax.

REQUIRED RESPONSES SUPPLIED BY OPERATOR:

- 01 Starting date (MMDDYYYY)
- 02 Number of copies (1-255)
- 03 Output to printer ID
- 04 Put report on hold? (Y or N)

COMMENTS:

None

OUTPUT SUMMARY (or NA):

The report lists the operator, date & time, program used, parcel number, name, address, legal, old & new category, year, quantity, unit, and value, tax code area, parcel type, effective date, expiration date, comment1, comment2, previous parcel number, map number, photo number, zone, cama area number, new deed number, and previous deed numbers. The total number of parcels and starting date are printed at the bottom of the report.

SPECIAL CONSIDERATIONS:

This program can be run stand-alone and is also embedded in PMB018 (Audit Trail) and can be run as often as required to maintain the balance of the entry system.
